

# README Generator Homework

---

## Description

This app makes it easy to create new (good!) README files.

## Table of Contents

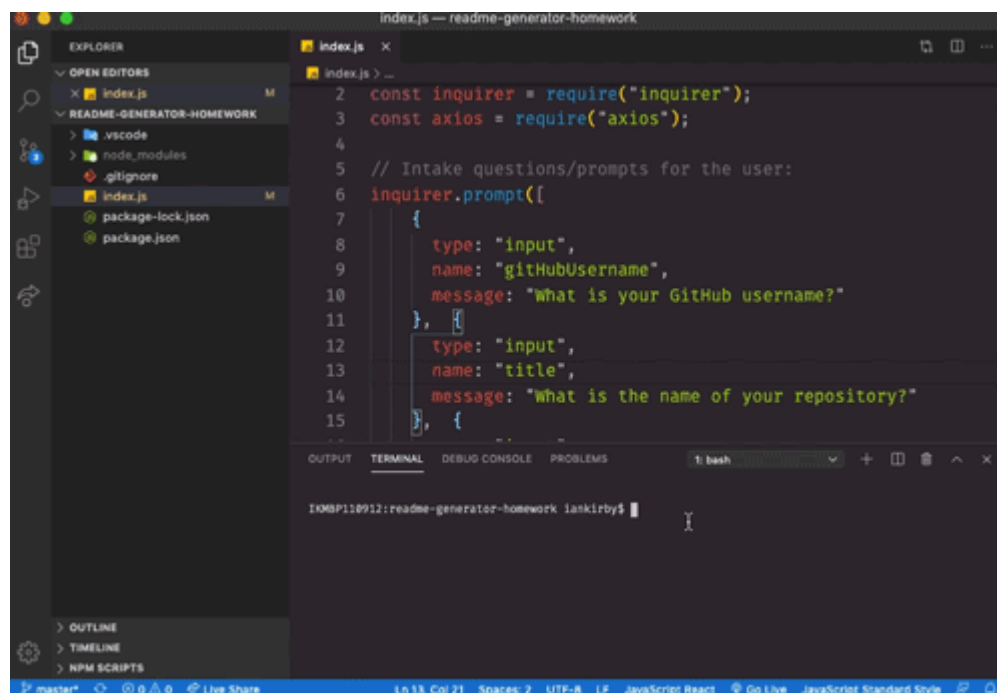

- [Installation](#)
- [Usage](#)
- [License](#)
- [Contributing](#)
- [Tests](#)
- [Questions](#)

## Installation

You will need to install and require the `inquirer` and `axios` node packages in addition to requiring the built-in `fs` package.

## Usage

Run the app by typing `'node index.js'` into the Terminal, then answer a series of questions, which will generate a new `README.md` file based on your responses.

The screenshot shows a VS Code editor with a file explorer on the left. The file explorer shows a project named 'README-GENERATOR-HOMEWORK' with files like 'index.js', 'package-lock.json', and 'package.json'. The main editor window shows the 'index.js' file with the following code:

```
1 const fs = require("fs");
2 const inquirer = require("inquirer");
3 const axios = require("axios");
4
5 // Intake questions/prompts for the user:
6 inquirer.prompt([
7   {
8     type: "input",
9     name: "githubUsername",
10    message: "What is your GitHub username?"
11  }, {
12    type: "input",
13    name: "title",
14    message: "What is the name of your repository?"
15  }
16 ], {
```

Below the editor, a terminal window is open with the command prompt `IXMBP118912:readme-generator-homework iankirby$`.

## Contributing

We take all forms of contributions but prefer Bitcoin. Kidding!

## Tests

Try to break this thing and let me know what you find 😊

## Questions?

Please feel free to reach out to me with any questions.
